

# Metaphors for God's Time in Science and Religion

*Cross-Currents in Religion and Culture*

General Editors:

**Elisabeth Jay**, Senior Research Fellow, Westminster College, Oxford

**David Jasper**, Professor in Literature and Theology, University of Glasgow

The study of theology and religion nowadays calls upon a wide range of interdisciplinary skills and cultural perspectives to illuminate the concerns at the heart of religious faith. Books in this new series will variously explore the contributions made by literature, philosophy and science in forming our historical and contemporary understanding of religious issues and theological perspectives.

*Published titles:*

# Acknowledgements

'The time has come,' the Walrus said,  
'To talk of many things:  
Of shoes – of ships – and sealing wax  
Of cabbages and kings,'  
Lewis Carroll, *Through the Looking Glass*

Called to accounts, I must acknowledge many debts. I owe most to the participants in a research project on 'perspectives on divine action' sponsored by the Center for Theology and the Natural Sciences at Berkeley, CA and its director Dr. Robert J. Russell; and the Vatican Observatory, Castel Gandolfo and Mt. Graham, AZ and its director Rev. Dr. George Coyne, S.J. During the past ten years, they have invited me to be part of a conversation concerning the issues of science and theology that have constantly stimulated my mental agility and provided the kind of hearty intellectual exchange at conferences rarely available in academic life. In addition to Drs. Russell and Coyne, ongoing discussions with Michael Arbib, George Ellis, Michael Heller, Nancey Murphy, Arthur Peacocke, Ted Peters, John Polkinghorne, William Stoeger, and Wesley Wildman have taught me far more than I have offered to them.

Earlier versions of Chapters 2, 4, and 5 were published as papers for the conferences and are reprinted here with the permission of the Vatican Observatory Press.<sup>1</sup> Portions of chapter 3 are reprinted with the permission of *The European Legacy*, the Journal of the International Society for the Study of European Ideas.<sup>2</sup>

I am also grateful to my editors, Drs. Elizabeth Jay and David Jasper, for their considerable patience about the completion of this manuscript. Becoming an administrator in a large urban university at the conclusion of a sabbatical leaves little time for thinking, let alone writing, and earns professional demerits with one's colleagues, especially when projects are due. I am also indebted to the administration, faculty, and staff of the School of Religious Studies and The Catholic University of America for a sabbatical leave which permitted me to investigate this project. My debts to friends who fed me at dinners and ignored my unavailability to reciprocate are incalculable.

Despite all the conversation and support, however, any failures of

understanding, whether in science or theology are my own. I am only grateful that there should be fewer of them for the time these thinkers spent with me. I thank Benjamin Bennett-Carpenter for the careful index, more a collaboration than a task performed. For whatever remains, I am thankful and dedicate the book to my mother, Jane Connor Happel, the chemist who relinquished a great love of her laboratory to raise me. I suspect that genes and culture cooperated to give me my passion for understanding science and religion. To have learned about both from a woman who read me Shakespeare and Carroll was sheer grace.

Stephen Happel, Dean  
School of Religious Studies  
The Catholic University of America  
Washington, DC
